Non-Hispanic Minority	61	1.3%	181	3.0%	213	3.2%
American Indian	36	0.8%	53	0.9%	50	0.8%
Asian or Pacific Islander	19	0.4%	40	0.7%	87	1.3%
Asian <sup>1</sup>	14	0.3%	35	0.6%	70	1.1%
Pacific Islander <sup>1</sup>	5	0.1%	5	0.1%	17	0.3%
Black (not Hispanic)	5	0.1%	16	0.3%	14	0.2%
Other Race	1	0.0%	0	0.0%	8	0.1%
Two or More Races <sup>2</sup>	—	—	72	1.2%	54	0.8%
Persons with Disabilities <sup>3</sup>	—	—	966 ± 62	18.5% ± 1.2%	—	—
Total Households	1,594	—	1,982	—	2,265	—
Households with Children under 18	657	41.2%	865	43.6%	947	41.8%
Households with Persons over 65	536	33.6%	565	28.5%	601	26.5%
Single Parent with Children under 18	83	5.2%	149	7.5%	180	7.9%
Large Families (5 or more persons)	328	20.6%	367	18.5%	460	20.3%
Owner-Occupied Housing Units	1,356	85.1%	1,566	79.0%	1,710	75.5%
Renter-Occupied Housing Units	238	14.9%	416	21.0%	555	24.5%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	16	8.2%	21	9.3%	24	8.9%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Single Parent with Children under 18	28	5.7%	51	8.7%	84	11.5%
Large Families (5 or more persons)	130	26.7%	154	26.2%	189	25.9%
Owner-Occupied Housing Units	402	82.5%	478	81.3%	550	75.3%
Renter-Occupied Housing Units	85	17.5%	110	18.7%	180	24.7%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Owner-Occupied Housing Units	79	87.8%	93	88.6%	116	91.3%
Renter-Occupied Housing Units	11	12.2%	12	11.4%	11	8.7%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	318	24.3%	397	23.4%	656	27.4%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	87	20.0%	90	16.9%	102	18.2%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	28	8.9%	38	6.7%	109	7.7%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	2,787	45.2%	3,559	44.9%	3,977	42.5%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	3,545	27.8%	4,666	25.5%	5,460	25.5%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	114	10.4%	96	7.7%	147	9.3%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Owner-Occupied Housing Units	2,467	82.3%	2,844	82.0%	3,006	80.5%
Renter-Occupied Housing Units	531	17.7%	624	18.0%	726	19.5%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Owner-Occupied Housing Units	1,068	69.2%	1,258	65.0%	1,256	59.6%
Renter-Occupied Housing Units	476	30.8%	678	35.0%	853	40.4%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	48	10.3%	103	10.8%	196	12.4%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	1	5.3%	2	5.9%	9	23.1%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	268	30.4%	302	30.0%	397	34.5%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	20	14.2%	24	14.0%	51	26.3%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	43	82.7%	26	38.8%	123	78.8%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	100	11.8%	49	8.0%	67	10.3%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	2,755	59.5%	5,241	51.9%	5,628	51.6%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Single Parent with Children under 18	1,239	11.1%	1,983	10.5%	3,686	12.3%
Large Families (5 or more persons)	3,748	33.6%	5,209	27.6%	7,746	26.0%
Owner-Occupied Housing Units	8,777	78.8%	15,478	81.9%	23,024	77.1%
Renter-Occupied Housing Units	2,366	21.2%	3,419	18.1%	6,825	22.9%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Owner-Occupied Housing Units	566	69.3%	633	71.4%	684	67.5%
Renter-Occupied Housing Units	251	30.7%	253	28.6%	329	32.5%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Single Parent with Children under 18	12	14.6%	16	13.7%	23	25.0%
Large Families (5 or more persons)	37	45.1%	55	47.0%	28	30.4%
Owner-Occupied Housing Units	37	45.1%	93	79.5%	82	89.1%
Renter-Occupied Housing Units	45	54.9%	24	20.5%	10	10.9%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	—	—	19	24.1%	32	45.1%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	55	11.2%	66	10.4%	144	18.3%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Owner-Occupied Housing Units	3,753	71.2%	7,813	75.6%	9,897	76.2%
Renter-Occupied Housing Units	1,518	28.8%	2,519	24.4%	3,093	23.8%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Single Parent with Children under 18	35	10.2%	49	11.0%	82	13.6%
Large Families (5 or more persons)	69	20.1%	76	17.1%	112	18.6%
Owner-Occupied Housing Units	259	75.5%	325	73.0%	409	67.9%
Renter-Occupied Housing Units	84	24.5%	120	27.0%	193	32.1%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	—	—	—	—	127	11.2%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Other Race	0	0.0%	0	0.0%	8	0.2%
Two or More Races <sup>2</sup>	—	—	20	0.8%	85	1.7%
Persons with Disabilities <sup>3</sup>	—	—	± 81	± 3.7%	—	—
Total Households	306	—	701	—	1,457	—
Households with Children under 18	186	60.8%	408	58.2%	809	55.5%
Households with Persons over 65	32	10.5%	51	7.3%	230	15.8%
Single Parent with Children under 18	19	6.2%	27	3.9%	100	6.9%
Large Families (5 or more persons)	73	23.9%	175	25.0%	401	27.5%
Owner-Occupied Housing Units	266	86.9%	656	93.6%	1,304	89.5%
Renter-Occupied Housing Units	40	13.1%	45	6.4%	153	10.5%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Large Families (5 or more persons)	1,661	24.9%	1,557	19.0%	2,144	20.3%
Owner-Occupied Housing Units	5,052	75.7%	6,307	77.0%	7,885	74.6%
Renter-Occupied Housing Units	1,618	24.3%	1,880	23.0%	2,678	25.4%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Single Parent with Children under 18	22	5.7%	29	7.2%	36	6.7%
Large Families (5 or more persons)	104	26.9%	83	20.6%	121	22.7%
Owner-Occupied Housing Units	323	83.7%	355	88.3%	438	82.0%
Renter-Occupied Housing Units	63	16.3%	47	11.7%	96	18.0%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Large Families (5 or more persons)	374	48.6%	746	44.9%	964	40.4%
Owner-Occupied Housing Units	652	84.8%	1,480	89.0%	1,997	83.6%
Renter-Occupied Housing Units	117	15.2%	182	11.0%	392	16.4%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	125	19.0%	183	14.0%	394	16.9%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	460	29.6%	548	23.9%	943	28.0%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	4,451	29.2%	7,811	26.1%	13,691	29.5%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	256	21.8%	615	22.3%	1,308	28.4%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Owner-Occupied Housing Units	—	—	—	—	131	80.4%
Renter-Occupied Housing Units	—	—	—	—	32	19.6%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Renter-Occupied Housing Units	788	34.1%	801	28.5%	948	31.0%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Households with Persons over 65	—	—	165	14.6%	399	12.5%
Single Parent with Children under 18	—	—	75	6.6%	347	10.8%
Large Families (5 or more persons)	—	—	298	26.3%	708	22.1%
Owner-Occupied Housing Units	—	—	1,045	92.4%	2,439	76.2%
Renter-Occupied Housing Units	—	—	86	7.6%	761	23.8%

<sup>1</sup> Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

<sup>2</sup> The 1990 Census did not have a category for multiple races.

<sup>3</sup> The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.
