Total Households	70,168	—	99,937	—	140,602	—
Households with Children under 18	36,165	51.5%	51,228	51.3%	72,229	51.4%
Households with Persons over 65	12,444	17.7%	15,776	15.8%	22,824	16.2%
Single Parent with Children under 18	4,632	6.6%	6,841	6.8%	10,105	7.2%
Large Families (5 or more persons)	19,894	28.4%	27,414	27.4%	40,329	28.7%
Owner-Occupied Housing Units	43,990	62.7%	66,786	66.8%	96,053	68.3%
Renter-Occupied Housing Units	26,178	37.3%	33,151	33.2%	44,549	31.7%

¹ Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

² The 1990 Census did not have a category for multiple races.

³ The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Large Families (5 or more persons)	87	54.0%	346	49.8%	1,053	44.7%
Owner-Occupied Housing Units	148	91.9%	663	95.4%	2,026	86.0%
Renter-Occupied Housing Units	13	8.1%	32	4.6%	329	14.0%

¹ Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

² The 1990 Census did not have a category for multiple races.

³ The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

Owner-Occupied Housing Units	170	84.6%	234	86.0%	243	85.3%
Renter-Occupied Housing Units	31	15.4%	38	14.0%	42	14.7%

¹ Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

² The 1990 Census did not have a category for multiple races.

³ The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

¹ Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

² The 1990 Census did not have a category for multiple races.

³ The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

¹ Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

² The 1990 Census did not have a category for multiple races.

³ The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.

¹ Since the 1990 Census tabulated Asians and Pacific Islanders as one category, the 1990 Asian and Pacific Islander populations are derived by summing the individual races listed in the 1990 Summary Tape File 1A. This derivation includes Hispanics and non-Hispanics, so the sum of the Asian and Pacific Islander populations is slightly larger than the aggregated Asian or Pacific Islander category, which includes only non-Hispanics. The reported Asian and Pacific Islander populations for 2000 and 2010 are non-Hispanic.

² The 1990 Census did not have a category for multiple races.

³ The margins of error for the disability data are associated with 90% confidence intervals. Since Census 2000 did not gather disability data on the population under age 5, the 2010 data (derived from the 2009–2011 American Community Survey 3-year estimates) have been adjusted to exclude the age group under 5. Despite these age adjustments, the two data points are not comparable given changes in survey design and revisions in the definition of disability.
