

# Ivory-Boyer Construction Report

In Partnership with The Ivory-Boyer Real Estate Center

## Third Quarter 2016

The following is a summary of Utah's permit authorized construction activity through the third quarter of 2016.

- Total construction value increased for the fourth consecutive year, totaling \$5.9 billion in construction value, 7.3 percent higher than the first nine months of 2015.
- Nonresidential construction value is at an all-time high, totaling \$2.1 billion in nonresidential construction, up 31 percent over 2015. This sector was led by \$362 million in hospital expansion at IHC's Dixie Regional Medical Center (\$148 million) and IHC's Utah Valley Hospital (\$214 million).
- Residential construction value was flat at \$3 billion, a slight decline of 2.4 percent from 2015.
- The number of permits issued for residential units is virtually unchanged from 2015. 13,777 permits were issued for dwelling units, only 111 permits above 2015.
- There were modest gains for single-family units. 8,093 permits were issued for single-family units, an increase of nearly six percent. Twenty-five percent of all single family homes receiving building permits through September were in five cities: Bluffdale, Lehi, Herriman, Saratoga Springs, and South Jordan.
- Multifamily units (apartment and condominium) declined for the second consecutive year. 5,546 permits were issued for multifamily units, a decline of 5.1 percent.
- Apartment permits are down but condominium permits are up. The number of permits issued for apartment units dropped 14 percent to 3,333 units while condominium permits were up 13 percent to 2,213 units. Nearly 40 percent of all permits for apartments units were issued by Salt Lake City.
- The value of additions, alterations and repairs were off slightly but still at a very high level: \$840.4 million in additions, alterations and repairs, down three percent from 2015.

**Table 2**  
**Cities Ranked by Value of Permit Authorized Construction**

(January through September 2016) (Million dollars)

City	Value
Provo	\$588.8
Salt Lake City	\$544.4
St. George	\$334.5
South Jordan	\$317.0
Lehi	\$234.0

Source: Ivory-Boyer Construction Database, Kem C. Gardner Policy Institute, University of Utah.

The value of construction in Utah through the third quarter of 2016 was \$5.9 billion. In inflation adjusted dollars, only the three pre-recession years of 2005-2007 had higher levels of construction value through the first nine months of the year (see Table 1 and Figure 1). A brief discussion of nonresidential and residential construction is given below followed by detailed construction data for Utah's counties and cities.

*Nonresidential Construction*

Utah's nonresidential construction sector was at an all-time high of \$2.1 billion through September 2016. The exceptionally strong year to date was due to a few large projects: the \$148 million expansion of the Dixie Regional Medical Center in St. George, the \$214 million expansion of the Utah Valley Hospital in Provo, the \$78 million student housing project at BYU, and the \$140 million expansion of the Missionary Training Center in Provo. The three large projects in Provo have pushed the city into first place among all cities in value of new construction with \$589 million (see Table 2). Ninety percent of the construction value in Provo City was in nonresidential buildings. Salt Lake City ranks second in total construction value at \$544 million. Nonresidential construction accounts for 65 percent of the construction value in the Salt Lake City.

As expected, hospitals dominate the value of "construction by type", through the third quarter the value of construction for hospitals totaled \$499 million (see Table 3). Office buildings ranked second at \$278.2 million followed by private education buildings with \$251.9 million then retail at \$210 million, and finally industrial buildings at \$157 million.

*Residential Construction*

The value of residential construction is down two percent through the first nine months of 2016. However, the number of building permits issued is up six percent signaling a decline in the permit value for residential units.

**Table 3**  
**Value of Construction in Utah by Type of Nonresidential Construction Through June 2016**

(January through September 2016) (Million dollars)

Type	Value
Hospital	\$498.9
Office	\$278.2
Education (Private)	\$251.9
Retail	\$210.1
Industrial	\$157.0
Churches	\$75.1

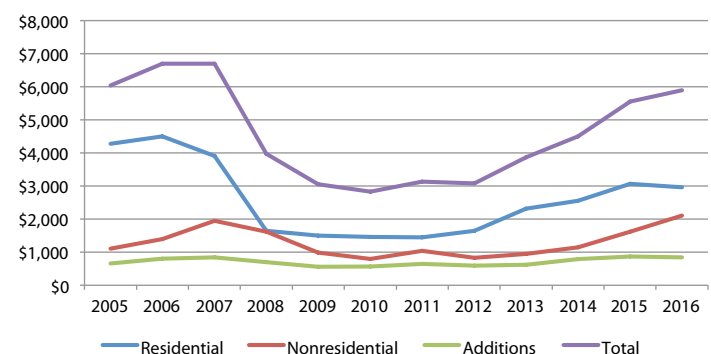

Source: Ivory-Boyer Construction Database, Kem C. Gardner Policy Institute, University of Utah.

Permit value/residential unit has declined from \$221,750/unit in 2015 to \$214,600/unit in 2016.

Through September of 2016, the number of residential building permits issued for new units was 13,777 compared to 13,666 in 2015 (see Figure 2). While the total number of units is flat, the mix of units has changed. The number of multifamily units (apartments, town homes and condominiums) has dropped from half of all residential units two years ago to 40 percent in 2016. Historically, the ratio of multifamily units to total residential units is about one-third to two-thirds. The market is gradually heading toward a reduced share of multifamily units and an increased share of single family units.

The number of multifamily units (apartments and condominiums) receiving building permits through September is off five percent from last year; 5,546 units compared to 5,847. Apartments had the largest share of multifamily activity with 3,333 units compared to 2,213 condominium and town home units (see Table 4). Apartment permits appear to have peaked in 2014 as this sector has steadily declined in the past two years. In 2016, permits were issued for 3,333 units through September, down 14

Source: Ivory-Boyer Construction Database, Kem Gardner Policy Institute, University of Utah.

percent from 2015. Market conditions remain strong for apartments but land cost, land availability, and tighter lending conditions have reduced activity despite strong demand for the product.

The number of building permits issued through September for single family units increased 5.8 percent in 2016. New home construction is concentrated in five cities clustered at the extreme southern end of Salt Lake County and northern end of Utah County: South Jordan, Herriman, Bluffdale, Lehi, and Saratoga Springs (see Tables 5 and 6). These five cities account for 25 percent of all single family building permits issued in Utah in the first nine months of 2016.

**Table 5**  
**Top Ranked Cities in Value Residential Construction –**  
 (January through September 2016)

City	Value (million)	Dwelling Units
