## Beaver County Population by Age, Sex, Race and Ethnicity, 2010-2018

Beaver County is located in southwestern Utah and borders Nevada. Major industries and employers in the county include animal production (Smithfield Hog Production), public education (Beaver County School District), health care (Beaver Valley Hospital), and local government.
Among Utah's 29 counties, Beaver County ranked 24th for largest total population, 15th for oldest median age, ninth for highest total dependency ratio, and fourth for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?
The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

## Box Elder County Population by Age, Sex, Race and Ethnicity, 2010-2018

Box Elder County is located in the northwestern corner of the state and borders Idaho and Nevada. Motor vehicle parts manufacturing (Autoliv), public education (Box Elder School District), metal fabrication (Nucor Corporation), and aerospace parts manufacturing are several of the dominant industries and employers in the county.
Among Utah's 29 counties, Box Elder County ranked eighth for largest total population, 19th for oldest median age, 14th for highest total dependency ratio, and 18th for highest male/female sex ratio.

## How do these Estimates Differ from Census Bureau Estimates?

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

## Carbon County Population by Age, Sex, Race and Ethnicity, 2010-2018

Carbon County is located in east-central Utah. Public education (Carbon County School District), mining (Canyon Fuels Company), state government, and health care (Castleview Hospital) are several of the largest industries and employers in the county.
Among Utah's 29 counties, Carbon County ranked 15th for largest total population, 10th for oldest median age, 16th for highest total dependency ratio, and 25th for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?
The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Daggett County Population by Age, Sex, Race and Ethnicity, 2010-2018

Daggett County is located in northwestern Utah and borders both Colorado and Wyoming. The federal government owns over $90 \%$ of the land in the county. The economy in Daggett County centers on service to tourists and users of Flaming Gorge National Recreation area. The largest employers in the county are the Daggett School District, Flaming Gorge Resort, and the federal government.

Among Utah's 29 counties, Daggett County ranked smallest for total population, oldest for median age, sixth for highest total dependency ratio, and highest for male/female sex ratio.

## Davis County Population by Age, Sex, Race and Ethnicity, 2010-2018

Davis County is on the Wasatch Front in north-central Utah. The dominant industries and employers include Hill Air Force Base (one of Utah's largest employers), public education (Davis County School District), and missile manufacturing (ATK Launch Systems). It is sometimes called a "bedroom county," since a significant portion of its workforce commutes to Salt Lake County.
Among Utah's 29 counties, Davis County ranked third for largest total population, 23 rd for oldest median age, 18 th for highest total dependency ratio, and 19th for highest male/female sex ratio.

## Duchesne County Population by Age, Sex, Race and Ethnicity, 2010-2018

Duchesne County is located in northeastern Utah in the Uinta Basin and is home to Kings Peak, the highest point in Utah. Public education (Duchesne School District), health care (Uintah Basin Medical Center), and oil and gas extraction (Newfield Exploration Company) are the major industries and employers in the county. Among Utah's 29 counties, Duchesne County ranked 16th for largest total population, 24th for oldest median age, fifth for highest total dependency ratio, and 12th for highest male/female sex ratio.

## How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

[^7]
## Emery County Population by Age, Sex, Race and Ethnicity, 2010-2018

Emery County is located in the eastcentral portion of the state. Utilities (PacifiCorp), public education (Emery County School District), construction (Parson \& Companies), and mining are several of the major industries and employers in the county.
Among Utah's 29 counties, Emery County ranked 21st for largest total population, 11 th for oldest median age, 13th for highest total dependency ratio, and ninth for highest male/female sex ratio.

## How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Garfield County Population by Age, Sex, Race and Ethnicity, 2010-2018

Garfield County is located in south-central Utah. The county is home to Bryce Canyon, part of Grand Staircase National Monument, Anasazi State Park, and the Burr Trail, making hospitality one of the major industries. Other important industries include public education, health care, and telecommunications. The largest employers in Garfield are Ruby's Inn, Garfield County School District, the federal government, and Intermountain Healthcare.

Among Utah's 29 counties, Garfield County ranked 25th for largest total population, seventh for oldest median age, eighth for highest total dependency ratio, and third for highest male/female sex ratio.

## Grand County Population by Age, Sex, Race and Ethnicity, 2010-2018

Grand County, located in east-central Utah, is one of the state's top tourist destinations with several major attractions including Arches National Park, part of Canyonlands National Park, and part of Dead Horse Point State Park. Public education, the federal government, tourism, and health care are major industries in the county. Grand School District, the National Park Service, and Moab Regional Hospital are the largest employers.

Among Utah's 29 counties, Grand County ranked 22nd for largest total population, third for oldest median age, 26th for highest total dependency ratio, and 22nd for highest male/female sex ratio.

Source: Kem C Gardner Policy Institute

Grand County Minority Distribution, 2018

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

[^11]
## Iron County Population by Age, Sex, Race and Ethnicity, 2010-2018

Iron County is located in the southwestern part of Utah and borders Nevada. It is named for the iron mines west of Cedar City, which houses Southern Utah University and the distinguished Utah Shakespeare Festival. Public and higher education, health care, and state government are the dominant industries. The largest employers in the county are Southern Utah University, Iron County School District, and Intermountain Healthcare.

Among Utah's 29 counties, Iron County ranked ninth for largest total population, 26th for oldest median age, 23rd for highest total dependency ratio, and 27th for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?
The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Kane County Minority Distribution, 2018

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

[^16]
## Millard County Population by Age, Sex, Race and Ethnicity, 2010-2018

Millard County is located in west-central Utah and shares a border with Nevada. The major industries include public education, utilities, local government, and mining. The largest employers in the county are Millard County School District, Intermountain Power Service, and Great Lake Cheese of Utah.
Among Utah's 29 counties, Millard County ranked 18th for largest total population, 12th for oldest median age, ninth for highest total dependency ratio, and 10th for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?
The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18 , divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

[^19]
## Rich County Population by Age, Sex, Race and Ethnicity, 2010-2018

Rich County in northern Utah borders both Idaho and Wyoming. The major industries are public education, local government, and restaurants. The largest employers in the county are Rich County School District, Rich County, and Trendwest.

Among Utah's 29 counties, Rich County ranked 27th for largest total population, ninth for oldest median age, second for highest total dependency ratio, and fifth for highest male/female sex ratio.

## How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Salt Lake County Population by Age, Sex, Race and Ethnicity, 2010-2018

Salt Lake County is located in north-central Utah and is home to the state capital, Salt Lake City. The county is the central location of the state's major religious, cultural, commercial, financial, medical, and educational institutions. The major industries are higher education, state government, federal government, health care, religious organizations, and financial services. The largest employers in the county are the University of Utah, the State of Utah, Intermountain Healthcare, the federal government, and Wal-Mart.

Among Utah's 29 counties, Salt Lake County ranked largest for total population, 17th for oldest median age, 28th for highest total dependency ratio, and 15th for highest male/female sex ratio.

## San Juan County Population by Age, Sex, Race and Ethnicity, 2010-2018

San Juan County is in the southeastern part of the state and borders Colorado, New Mexico, and Arizona. The county has abundant outdoor recreation, natural resources, and oil and gas fields. San Juan is also the only county in the state where minority race/ethnic groups comprise a majority of the population, because of the presence of the Navajo Nation. Major industries in the county include public education, health care, the government, and higher education. The largest employers are San Juan School District, Utah Navajo Health System, and the State of Utah.

Among Utah's 29 counties, San Juan County ranked 17th for largest total population, 21st for oldest median age, 19th for highest total dependency ratio, and 20th for highest male/female sex ratio.

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

[^24]
## Sanpete County Population by Age, Sex, Race and Ethnicity, 2010-2018

Sanpete County is located in the center of the state and home to Snow College. Major industries include higher education, state government, public education, and animal processing. Two of Sanpete County's biggest employers are the Central Utah Correctional Facility and Snow College.
Among Utah's 29 counties, Sanpete County ranked 13th for largest total population, 27th for oldest median age, 27th for highest total dependency ratio, and second for highest male/female sex ratio.

## How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

[^27]
## Summit County Population by Age, Sex, Race and Ethnicity, 2010-2018

Summit County is located in northeastern Utah and borders Wyoming. The county earned its name because it contains 39 of the highest mountain peaks in Utah. The county is also home to Park City, which is known for winter sports, especially skiing, and the Sundance Film Festival. Major industries include hospitality, public education and local government. The largest employers in Summit County are The Canyons Resort, Deer Valley Resort, Park City, and Park City School District.

Among Utah's 29 counties, Summit County ranked 10th for largest total population, fourth for oldest median age, lowest for total dependency ratio, and sixth for highest male/female sex ratio.

## Summit County Minority Distribution, 2018

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

[^28]
## Tooele County Population by Age, Sex, Race and Ethnicity, 2010-2018

Tooele County is located in northwestern Utah. It is known for mining and industrial development. The county is also known for the Bonneville Salt Flats and the Bonneville Speedway. Major industries include warehousing, mining, and the federal government. The largest employers in the county are Tooele School District, Wal-Mart, the federal government, and Cabela's.

Among Utah's 29 counties, Tooele County ranked seventh for largest total population, 17th for oldest median age, 21 st for highest total dependency ratio, and 17th for highest male/female sex ratio.

## How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Uintah County Population by Age, Sex, Race and Ethnicity, 2010-2018

Uintah County is located in northeastern Utah and shares a border with Colorado. Uintah County has relatively little private land-almost $70 \%$ is publicly owned. The county is home to Dinosaur National Monument and also includes a significant portion of the Uintah and Ouray Indian Reservation. Major industries include public education, government, and health-care. Uintah School District, Ute Indian Tribe Local Government, and the State of Utah are the largest employers in the county.

Among Utah's 29 counties, Uintah County ranked 11th for largest total population, 22nd for oldest median age, 15th for highest total dependency ratio, and eighth for highest male/female sex ratio.

Uintah County Minority Distribution, 2018

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18 , divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

[^31]
## Utah County Population by Age, Sex, Race and Ethnicity, 2010-2018

Utah County is located in north-central Utah. The county is home to both Brigham Young University and Utah Valley University. Major industries in the county include higher education, public education, government, health-care, and essential oils production. The largest employers are Brigham Young University, Alpine School District, Utah Valley University, and the State of Utah.

Among Utah's 29 counties, Utah County ranked second for largest total population, 28th for oldest median age, 22nd for highest total dependency ratio, and 24th for highest male/female sex ratio.

## How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Washington County Population by Age, Sex, Race and Ethnicity, 2010-2018

Washington County is located in the southwestern corner of the state. The scenic beauty, proximity to Zion National Park, and warm climate attract retirees, tourists, and a large seasonal population. The county includes a portion of the Paiute Indian Reservation and is also home to Dixie State University. Major industries in the county include health care, public and higher education, as well as government. Intermountain Healthcare, Washington County School District, and Dixie State University are the largest employers.

Among Utah's 29 counties, Washington County ranked fifth for largest total population, eighth for oldest median age, fourth for highest total dependency ratio, and 28th for highest male/female sex ratio.

## Definitions:

Population is the "usual resident" population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by
the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

[^35]
## Wayne County Population by Age, Sex, Race and Ethnicity, 2010-2018

Wayne County is located in the southeastern portion of the state. The county contains several of the state's most popular tourist destinations including parts of Canyonlands National Park, Capitol Reef National Park, and Glen Canyon National Recreation Area. Major industries in the county include public education, government, health care, and hospitality. Wayne County School District, the federal government, and Wayne Community Health are the largest employers.
Among Utah's 29 counties, Wayne County ranked 26th for largest total population, sixth for oldest median age, third for highest total dependency ratio, and 14th for highest male/female sex ratio.

## How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

## Weber County Population by Age, Sex, Race and Ethnicity, 2010-2018

Weber County is located in north-central Utah. The county is home to part of Hill Air Force Base, the sixth-largest employer in Utah. Major industries in the county include the federal government, public and higher education, health care, and manufacturing. Hill Air Force Base, Weber County School District, Intermountain Healthcare, Weber State University, and Autoliv are the largest employers in the county.

Among Utah's 29 counties, Weber County ranked fourth for largest total population, 20th for oldest median age, 23rd for highest total dependency ratio, and 16th for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?
The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee.
