

Beaver County Population by Age, Sex, Race and Ethnicity, 2010–2019

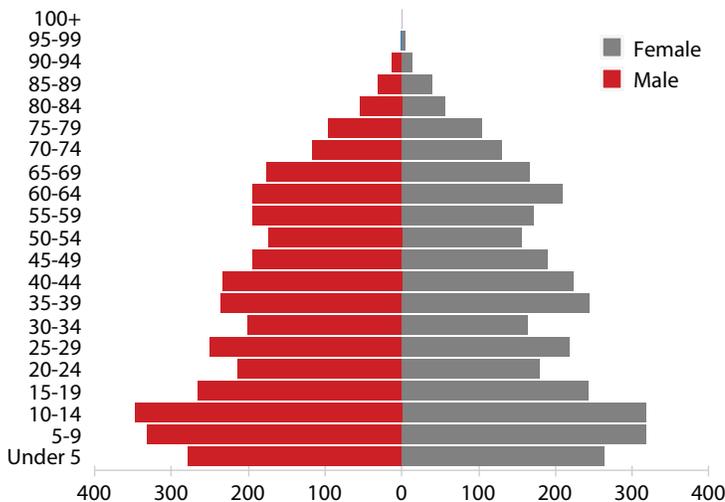

Beaver County is located in southwestern Utah and borders Nevada. Major industries and employers in the county include animal production (Smithfield Hog Production), public education (Beaver County School District), health care (Beaver Valley Hospital), and local government.

Among Utah's 29 counties, Beaver County ranked sixth for smallest total population, 15th for oldest median age, 10th for highest total dependency ratio, and sixth for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Box Elder County Population by Age, Sex, Race and Ethnicity, 2010–2019

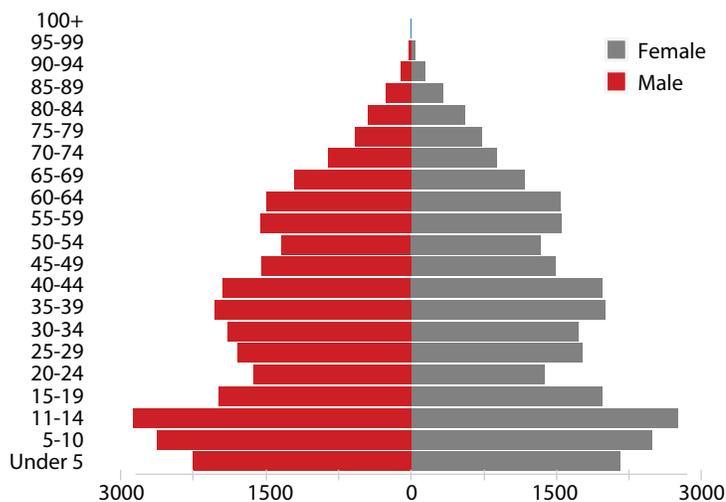

Box Elder County is located in the northwestern corner of the state and borders Idaho and Nevada. Motor vehicle parts manufacturing (Autoliv), public education (Box Elder School District), metal fabrication (Nucor Corporation), and aerospace parts manufacturing are several of the dominant industries and employers in the county.

Among Utah's 29 counties, Box Elder County ranked eighth for largest total population, 10th for youngest median age, 14th for highest total dependency ratio, and 13th for lowest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Cache County Population by Age, Sex, Race and Ethnicity, 2010–2019

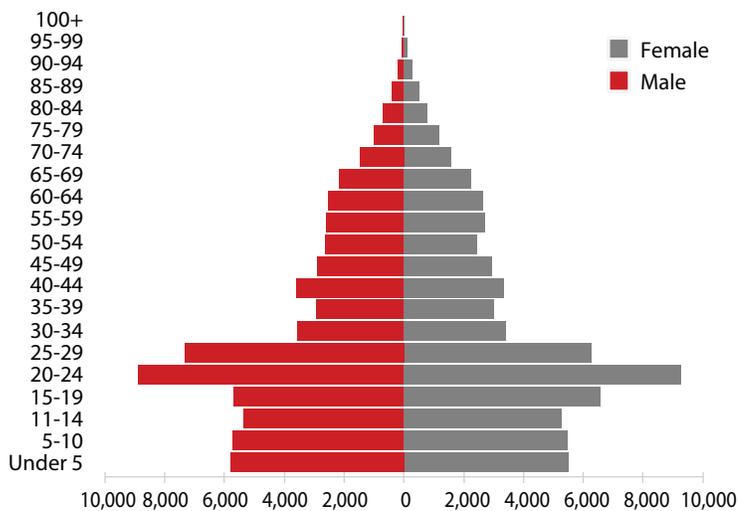

Cache County is located in north-central Utah and shares a border with Idaho. Higher education, public education, health care, and animal production are the largest industries in the county. Utah State University, Cache County School District, Intermountain Healthcare, and Conservice – an accounting firm – are the largest employers in the county.

Among Utah's 29 counties, Cache County ranked sixth for largest total population, youngest for median age, fourth for lowest total dependency ratio, and fifth for lowest male/female sex ratio.

Definitions:

Population is the “usual resident” population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by

the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

Daggett County Population by Age, Sex, Race and Ethnicity, 2010–2019

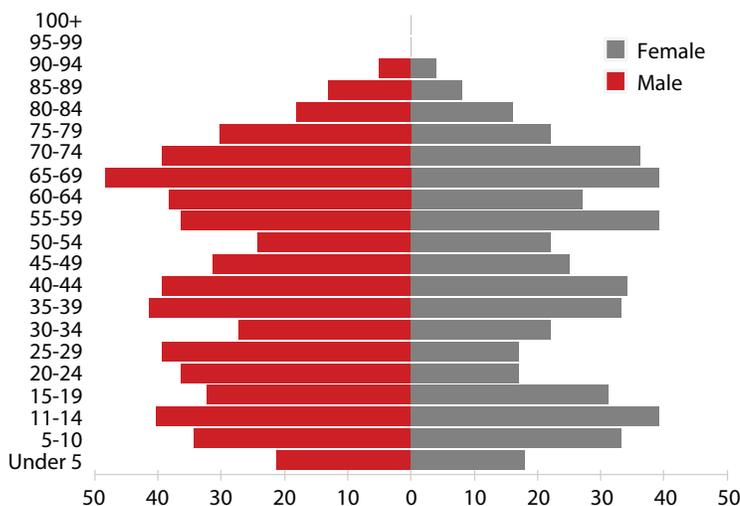

Daggett County is located in northeastern Utah and borders both Colorado and Wyoming. The federal government owns over 90% of the land in the county. The economy in Daggett County centers on service to tourists and users of Flaming Gorge National Recreation area. The largest employers in the county are the Daggett School District, Flaming Gorge Resort, and the federal government.

Among Utah's 29 counties, Daggett County ranked smallest for total population, oldest for median age, third for highest total dependency ratio, and highest for male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Davis County Population by Age, Sex, Race and Ethnicity, 2010–2019

Davis County is on the Wasatch Front in north-central Utah. The dominant industries and employers include Hill Air Force Base (one of Utah’s largest employers), public education (Davis County School District), and missile manufacturing (ATK Launch Systems). It is sometimes called a “bedroom county,”

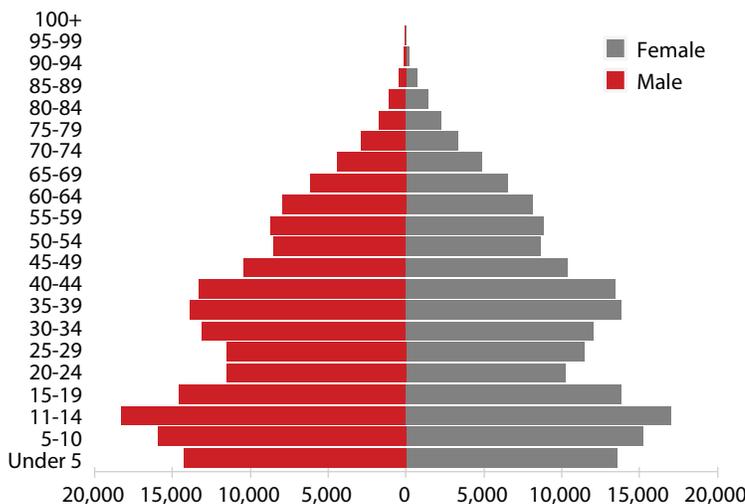

since a significant portion of its workforce commutes to Salt Lake County.

Among Utah’s 29 counties, Davis County ranked third for largest total population, seventh for youngest median age, 13th for lowest total dependency ratio, and 12th for lowest male/female sex ratio.

Duchesne County Population by Age, Sex, Race and Ethnicity, 2010–2019

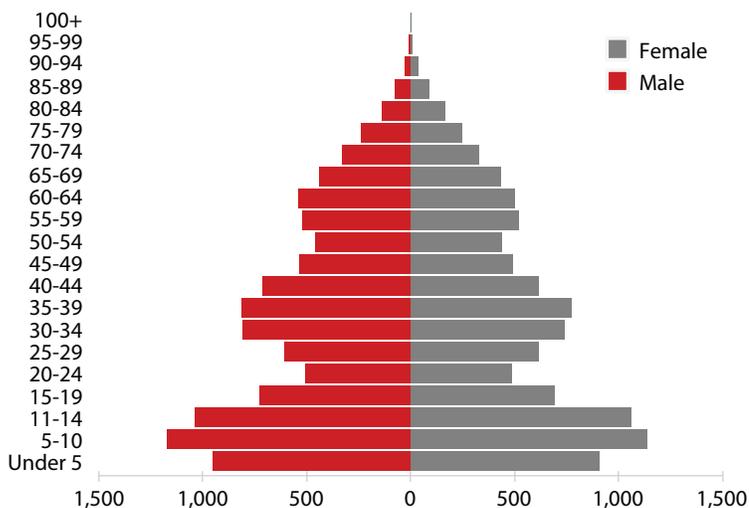

Duchesne County is located in northeastern Utah in the Uinta Basin and is home to Kings Peak, the highest point in Utah. Public education (Duchesne School District), health care (Uintah Basin Medical Center), and oil and gas extraction (Newfield Exploration Company) are the major industries and employers in the county.

Among Utah's 29 counties, Duchesne County ranked 14th for smallest total population, sixth for youngest median age, sixth for highest total dependency ratio, and 12th for highest male/female sex ratio.

Emery County Population by Age, Sex, Race and Ethnicity, 2010–2019

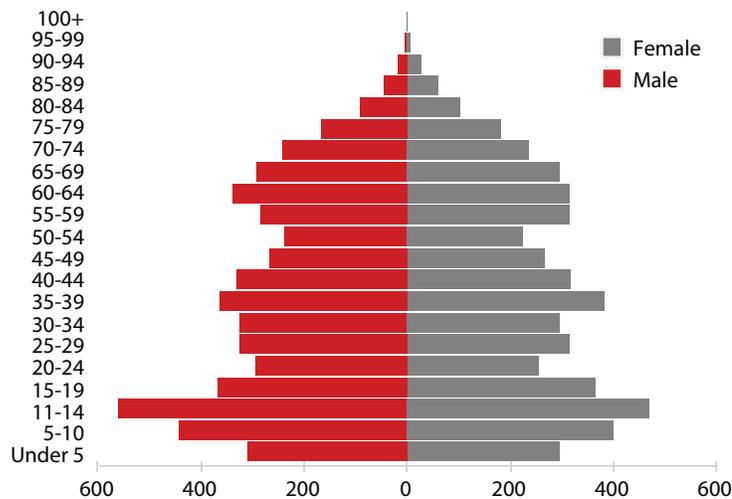

Emery County is located in the east-central portion of the state. Utilities (PacifiCorp), public education (Emery County School District), construction (Parson & Companies), and mining are several of the major industries and employers in the county.

Among Utah's 29 counties, Emery County ranked ninth for smallest total population, 11th for oldest median age, 11th for highest total dependency ratio, and 10th for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Garfield County Population by Age, Sex, Race and Ethnicity, 2010–2019

Garfield County is located in south-central Utah. The county is home to Bryce Canyon, part of Grand Staircase National Monument, Anasazi State Park, and the Burr Trail, making hospitality one of the major industries. Other important industries include public education, health care, and telecommunications. The largest employers in Garfield are Ruby's

Inn, Garfield County School District, the federal government, and Intermountain Healthcare.

Among Utah's 29 counties, Garfield County ranked fifth for smallest total population, seventh for oldest median age, eighth for highest total dependency ratio, and third for highest male/female sex ratio.

Grand County Population by Age, Sex, Race and Ethnicity, 2010–2019

Grand County, located in east-central Utah, is one of the state's top tourist destinations with several major attractions including Arches National Park, part of Canyonlands National Park, and part of Dead Horse Point State Park. Public education, the federal government, tourism, and health care are major

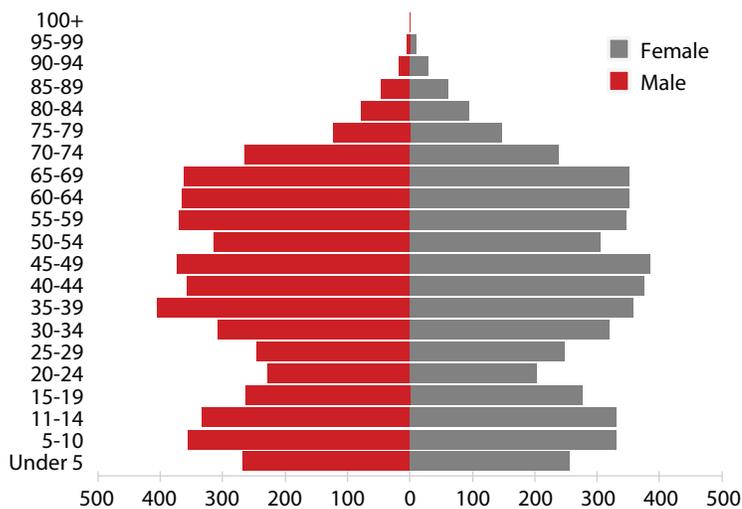

industries in the county. Grand School District, the National Park Service, and Moab Regional Hospital are the largest employers.

Among Utah's 29 counties, Grand County ranked eighth for smallest total population, third for oldest median age, seventh for lowest total dependency ratio, and ninth for lowest male/female sex ratio.

Definitions:

Population is the “usual resident” population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by

the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

Iron County Population by Age, Sex, Race and Ethnicity, 2010–2019

Iron County is located in the southwestern part of Utah and borders Nevada. It is named for the iron mines west of Cedar City, which houses Southern Utah University and the distinguished Utah Shakespeare Festival. Public and higher education, health care, and state government are the dominant industries. The largest employers in the

county are Southern Utah University, Iron County School District, and Intermountain Healthcare.

Among Utah's 29 counties, Iron County ranked ninth for largest total population, fourth for youngest median age, sixth for lowest total dependency ratio, and third for lowest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Millard County Population by Age, Sex, Race and Ethnicity, 2010–2019

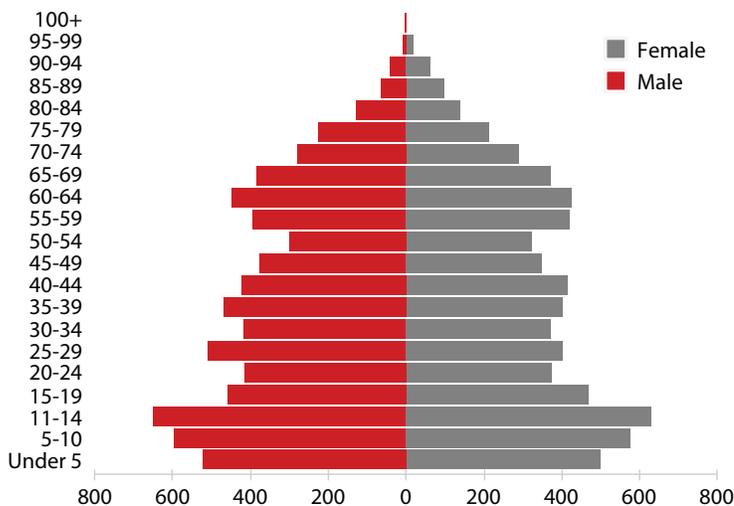

Millard County is located in west-central Utah and shares a border with Nevada. The major industries include public education, utilities, local government, and mining. The largest employers in the county are Millard County School District, Intermountain Power Service, and Great Lake Cheese of Utah.

Among Utah's 29 counties, Millard County ranked 12th for smallest total population, 14th for oldest median age, ninth for highest total dependency ratio, and eighth for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Salt Lake County Population by Age, Sex, Race and Ethnicity, 2010–2019

Salt Lake County is located in north-central Utah and is home to the state capital, Salt Lake City. The county is the central location of the state’s major religious, cultural, commercial, financial, medical, and educational institutions. The major industries are higher education, state government, federal government, health care, religious organizations, and financial services. The

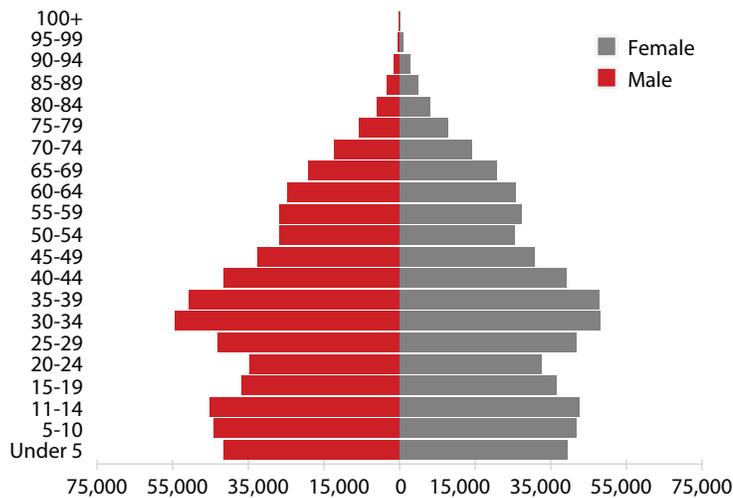

largest employers in the county are the University of Utah, the State of Utah, Intermountain Healthcare, the federal government, and Wal-Mart.

Among Utah’s 29 counties, Salt Lake County ranked largest for total population, 12th for youngest median age, second for lowest total dependency ratio, and 14th for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

San Juan County Population by Age, Sex, Race and Ethnicity, 2010–2019

San Juan County is in the southeastern part of the state and borders Colorado, New Mexico, and Arizona. The county has abundant outdoor recreation, natural resources, and oil and gas fields. San Juan is also the only county in the state where minority race/ethnic groups comprise a majority of the population, because of the presence of the Navajo Nation. Major industries

in the county include public education, health care, the government, and higher education. The largest employers are San Juan School District, Utah Navajo Health System, and the State of Utah.

Among Utah's 29 counties, San Juan County ranked 13th for smallest total population, ninth for youngest median age, 11th for lowest total dependency ratio, and 10th for lowest male/female sex ratio.

Definitions:

Population is the “usual resident” population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by

the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

Sevier County Population by Age, Sex, Race and Ethnicity, 2010–2019

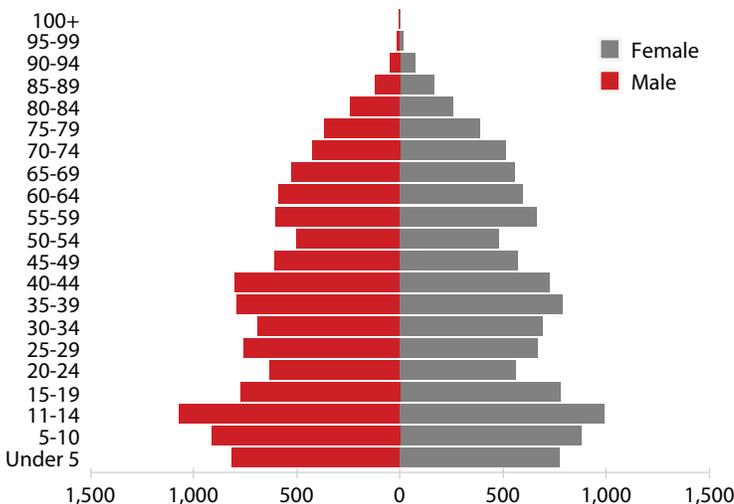

Sevier County is located in south-central Utah. Major industries include public education, mining, state government, freight, and health care. The largest employers in the county are Sevier School District, Canyon Fuels Company, and the State of Utah.

Among Utah's 29 counties, Sevier County ranked 14th for largest total population, 12th for oldest median age, 12th for highest total dependency ratio, and eighth for lowest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Summit County Population by Age, Sex, Race and Ethnicity, 2010–2019

Summit County is located in northeastern Utah and borders Wyoming. The county earned its name because it contains 39 of the highest mountain peaks in Utah. The county is also home to Park City, which is known for winter sports, especially skiing, and the Sundance Film Festival. Major industries include hospitality, public education and local government. The

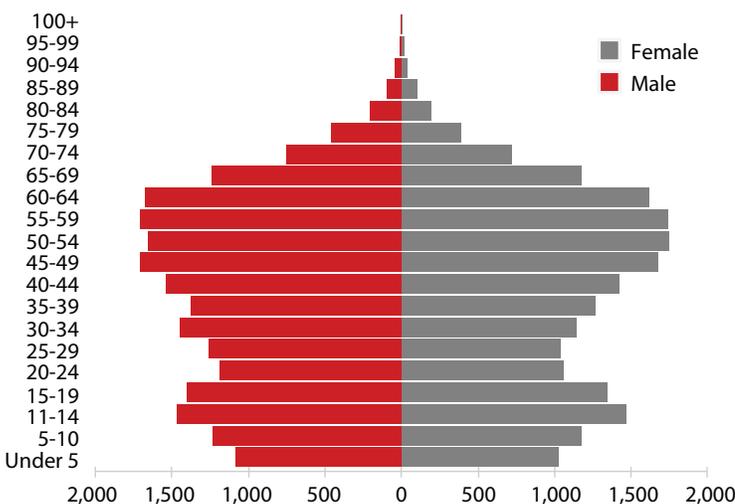

largest employers in Summit County are The Canyons Resort, Deer Valley Resort, Park City, and Park City School District.

Among Utah's 29 counties, Summit County ranked 10th for largest total population, fourth for oldest median age, lowest for total dependency ratio, and fifth for highest male/female sex ratio.

Definitions:

Population is the “usual resident” population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by

the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

Uintah County Population by Age, Sex, Race and Ethnicity, 2010–2019

Uintah County is located in northeastern Utah and shares a border with Colorado. Uintah County has relatively little private land—almost 70% is publicly owned. The county is home to Dinosaur National Monument and also includes a significant portion of the Uintah and Ouray Indian Reservation. Major industries include public education, government, and health-care.

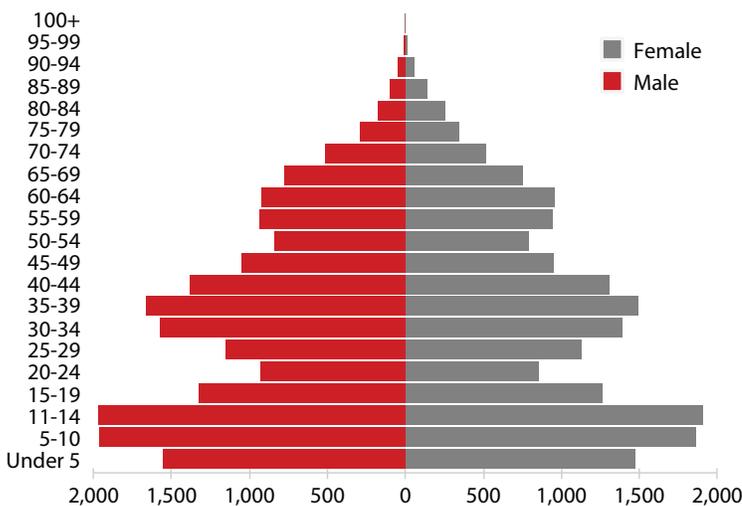

Uintah School District, Ute Indian Tribe Local Government, and the State of Utah are the largest employers in the county.

Among Utah's 29 counties, Uintah County ranked 11th for largest total population, eighth for youngest median age, 15th for highest total dependency ratio, and seventh for highest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Utah County Population by Age, Sex, Race and Ethnicity, 2010–2019

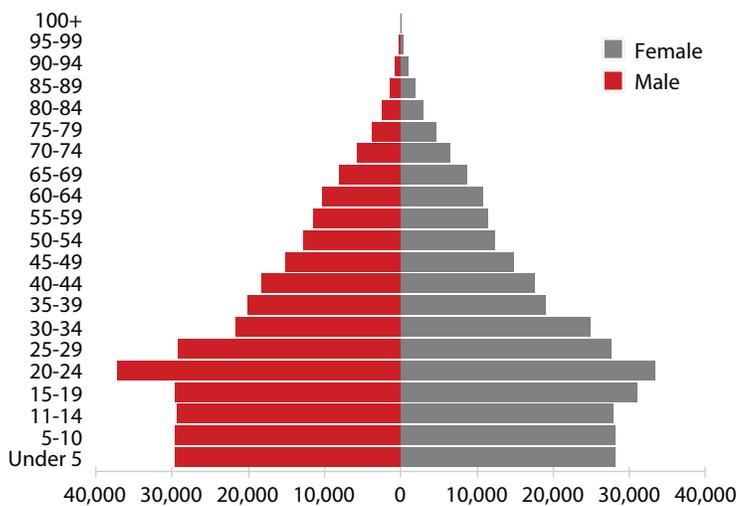

Utah County is located in north-central Utah. The county is home to both Brigham Young University and Utah Valley University. Major industries in the county include higher education, public education, government, health-care, and essential oils production. The largest employers are Brigham Young University, Alpine School District, Utah Valley University, and the State of Utah.

Among Utah's 29 counties, Utah County ranked second for largest total population, second for youngest median age, ninth for lowest total dependency ratio, and sixth for lowest male/female sex ratio.

Definitions:

Population is the “usual resident” population, which resides in the geography for more than half the year. Sex ratio is the number of males divided by females. Median age is the age at which half the population is older and younger. Youth dependency ratio is the population under age 18, divided by

the population 18 through 64. Retirement dependency ratio is the population 65 and older, divided by the population 18 through 64. Total dependency ratio is the sum of the youth and retirement dependency ratios. All estimates are dated July 1.

Washington County Population by Age, Sex, Race and Ethnicity, 2010–2019

Washington County is located in the southwestern corner of the state. The scenic beauty, proximity to Zion National Park, and warm climate attract retirees, tourists, and a large seasonal population. The county includes a portion of the Paiute Indian Reservation and is also home to Dixie State University. Major industries in the county include health care,

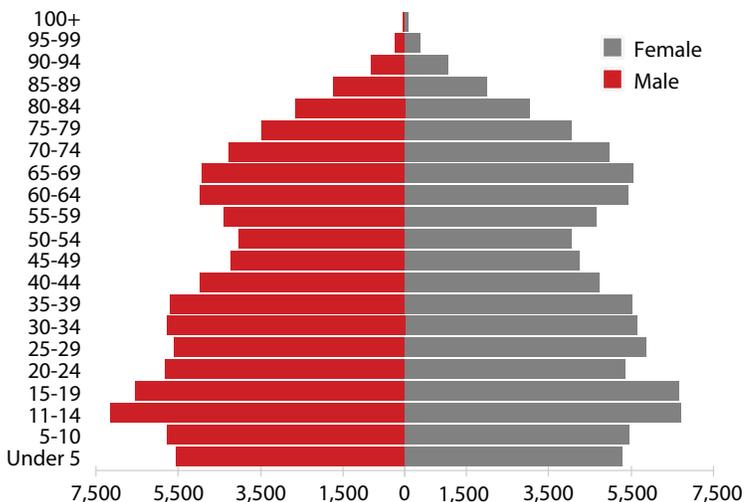

public and higher education, as well as government. Intermountain Healthcare, Washington County School District, and Dixie State University are the largest employers.

Among Utah's 29 counties, Washington County ranked fifth for largest total population, eighth for oldest median age, seventh for highest total dependency ratio, and second for lowest male/female sex ratio.

How do these Estimates Differ from Census Bureau Estimates?

The Kem C. Gardner Policy Institute produces an annual suite of detailed population estimates. These control to official numbers published by the Utah Population Committee. The Census Bureau produces similar population estimates that are used for federal purposes. Our estimates incorporate local data sources and knowledge to account for unique Utah characteristics, and also add additional detail. They are generated using statistical models including the Utah Demographic and Economic Model (UDEM).

Wayne County Population by Age, Sex, Race and Ethnicity, 2010–2019

Wayne County is located in the southeastern portion of the state. The county contains several of the state’s most popular tourist destinations including parts of Canyonlands National Park, Capitol Reef National Park, and Glen Canyon National Recreation Area. Major industries in the county include public education, government, health care, and

hospitality. Wayne County School District, the federal government, and Wayne Community Health are the largest employers.

Among Utah’s 29 counties, Wayne County ranked fourth for smallest total population, fifth for oldest median age, fourth for highest total dependency ratio, and 11th for lowest male/female sex ratio.

Weber County Population by Age, Sex, Race and Ethnicity, 2010–2019

Weber County is located in north-central Utah. The county is home to part of Hill Air Force Base, the sixth-largest employer in Utah. Major industries in the county include the federal government, public and higher education, health care, and manufacturing. Hill Air Force Base, Weber County School District, Intermountain Healthcare, Weber State

University, and Autoliv are the largest employers in the county.

Among Utah's 29 counties, Weber County ranked fourth for largest total population, 11th for youngest median age, fifth for lowest total dependency ratio, and 15th for highest male/female sex ratio.
