

Graduate Assistantship for 2022-2023

DEMOGRAPHY FOCUS

The Kem C. Gardner Policy Institute invites applications for a graduate assistant position for the 2022-2023 school year.

The graduate assistant will work with the premier demographic team serving Utah. Applied research is determined by the Director of Demographic Research, and may cover a range of topics depending upon current needs and the successful candidate's skillset and interests. Potential topics include (but are not limited to) contemporary, historical, and projected demographic data from local and national sources such as the Utah Department of Health and U.S. Census Bureau; demographic change through birth, death, and migration processes; population characteristics such as age, gender, race, ethnicity, socioeconomic status, and family living arrangements; small-area demography including geo-spatial patterns of residence, housing, and employment; and the public communication of demographic research.

The position requires a 20-hour per week commitment during Fall 2022 and Spring 2023 semesters. Compensation will be \$17,000 (\$8,500/semester) and up to a 100% tuition waiver. The tuition waiver does not cover special fees nor does it cover differential tuition. Other limitations may apply and we encourage students to discuss those with their advisor. Please note that this position is subject to approval by the university.

The graduate assistant must be enrolled full-time (9-12 credit hours) for both semesters in a graduate degree program at the University of Utah. An excellent academic record and solid grounding in demographic concepts, data analysis, graphic communication, and communication of research results are desired. Graduate assistants must maintain a GPA of 3.0 of higher during the 2022-2023 academic year.

To apply, please submit the application, a resume, and a short writing sample (2-5 pages) by April 1, 2022 before 5:00 pm to:

Ms. Shannon Simonsen, Research Coordinator shannon.simonsen@utah.edu
