

Utah's Long-term Demographic and Economic Projections

July 1, 2017

July 1, 2017

Utah Legislative Fiscal Analyst's Office
Utah Governor's Office of Management and Budget
State Capitol
Salt Lake City, Utah 84114

Subject: Letter of Transmittal

In accordance with our September 1, 2015 Memorandum of Understanding, the Kem C. Gardner Policy Institute is pleased to submit our 2017 vintage Long-term Demographic and Economic Projections.

This binder, and the accompanying flash drive, include the raw data files for many of the most requested data items at the state- and county-level, including population, school age population, retirement age population, population pyramids, components of population change, employment, and households. The complete datasets are available now upon request, and over the next several weeks will be placed online at www.gardner.utah.edu.

In the coming months, the Gardner Policy Institute will be preparing research briefs, fact sheets, snapshots, web-enabled visualizations, and other products to share these projections statewide. We will also prepare detailed documentation of our data sources and methods.

I extend my appreciation to the many entities that collaborated with us on this research product. I also want to thank our demographic and economic teams led by Pam Perlich and Juliette Tennert at the Gardner Policy Institute for their talent and professionalism in preparing these projections.

I'm confident these projections will help Utah state and local government better plan for the state's long-term needs in education, transportation, water, and other planning decisions. Utah businesses, nonprofit organizations, and the public will also benefit as we plan to keep Utah prosperous for years to come.

Sincerely,

Natalie Gochnour, Director
