

Governor Gary R. Herbert

# UTAH LEADS TOGETHER

Utah's plan for a health and economic recovery

**GOAL:** Provide Utah businesses and residents with clarity and specifics about Utah's plan for a health and economic recovery.

Every Utahn plays a role because we lead together. To be successful Utahns must take three major actions:

1

Rigorously follow public health guidelines and measure transmission rates

2

Stay engaged with the economy

3

Assist those in need

The Utah Leads Together plan recognizes that markets correct, recessions end, and prosperity returns. The plan includes three phases:

## URGENT PHASE

8-12 weeks beginning March 16, 2020

- Urgent public health response coupled with historic economic stimulus
- Utah economy remains open and operating in compliance with specific public health practices
- Adherence to this phase shortens other phases and accelerates recovery

**Measure: COVID-19 transmission rate of 1.5 at beginning and 1.0 at the end.**

## STABILIZATION PHASE

10-14 weeks

- Continue public health measures and interventions begin to take hold
- Measure: COVID-19 transmission rate less than one and declining**

## RECOVERY PHASE

8-10 weeks

- Return to stability and growth
- Measure: COVID-19 transmission rate of near zero**

*"Times like these bring out the best in people.  
This is a time for Utah to shine."*

— Gov. Gary Herbert

We can ADAPT, INNOVATE, and OVERCOME.
